ONLINE SEMINAR

Advancing Sustainable Agricultural Value Chains through Strengthening Transdisciplinary Skills and Cooperation in East African Doctoral Education

ADVALUE addresses the need for qualified doctorates and future academic professionals in agricultural sciences who impact the research and teaching capacities of their Higher Education Institutions and contribute to local and regional achievement of SDG goals with the development of sustainable agricultural value chains.

ADVALUE virtual seminar series

#2

Topic: Optical sensing and AI tailored for African agriculture

Speaker: Prof. Abozar Nasirahmadi (Professor of Digitalization in Agricultural Engineering ethics at SLU, Sweden)

Date: 19 February 2025

Time: 10 am CET / 12 pm EAT (duration 60 minutes)

Language: English

Description: This event takes place within the ADVALUE project (www.erasmus-advalue.org) in the frame of module development for PhD education in agricultural sciences in East Africa.

This seminar belongs to module 1 – about scientific working – and focusses on case examples of the use of AI in scientific working..
