ONLINE SEMINAR

Online Panel Discussion

9 December 2025
10:00-11:30 EAT

Scenarios for future rangelands – questions for research and policies

Chair:

Prof. Dr. Oliver Wasonga,
University of Nairobi
Kenya

Speakers:

Dr. Halid Kirunda, Uganda Christian University
Prof. Anthony Egeru, Makerere University Uganda
Dr. Simon Muti, Pwani University Kilifi, Kenya

The ADVALUE project working groups have developed four postgraduate training modules. Module 3 addresses Sustainable Rangeland Resource Management, which is critical in Eastern Africa where 60% of the land surface is arid and semi-arid rangelands. Managing and studying these socio-ecological systems tackle open questions from various disciplines. This panel discussion explores cross-cutting issues, which might reveal different perspectives or underlying paradigms, as well as gaps in research and policies.
